Message from the Warden

Welcome to Green Bay Correctional Institution's Annual Report for the 2022 Fiscal Year. The annual report is a good reflection on the many opportunities offered to the persons in our care (PIOC) and we hope this shares both our enthusiasm as a part of the community as well as our efforts from 2022.

In 2020 GBCI was impacted, as were all facets of Wisconsin, by the introduction of the Coronavirus more commonly known as Covid-19. Continuing through 2021 and into 2022 GBCI has continued to respond Covid-19 similar to communities in the surrounding area. GBCI continues to act in concert with local, state, and federal guidelines while responding. We are thankful for the diligent efforts of staff and the cooperation of individuals residing within GBCI, without them the steps taken would likely not have been successful.

Over the past year similar challenges faced by the community have affected GBCI also. In response GBCI and the Department of Corrections have redoubled recruitment efforts to reinforce our staffing resources and while this will continue to be an area we emphasize we have seen progress.

Since opening in August of 1898 Green Bay Correctional Institution has worked to maintain safe institution operations to protect the public, protect staff, and protect the PIOC. We continuously work to be a good neighbor with our surrounding communities, and have over time developed strong relationships with our community partners and stakeholders. We also recognize many of the PIOC will one day release to the community, and our mission includes providing opportunities for positive change and eventually a successful reintegration into the community.

It is important to recognize any success GBCI has is based on one thing, our team of dedicated, knowledgeable, and hardworking staff. It is only through their efforts the achievements and successes found in these pages are possible. With any large organization there are many changes, GBCI staff's ability to adapt to these changes, remain open to new ideas, and maintain safe operations while demonstrating a high level of professionalism provides the foundation of every new initiative. It is through these initiatives we are able to provide the many opportunities for positive change for the PIOC.

GBCI staff will continue to build positive relationships and community ties as we move into the New Year to better serve the citizens of Wisconsin, and we look forward to another rewarding year in the Brown County Community.

Dylon Radtke, Warden Michelle Haese, Deputy Warden

Purpose Statement

Green Bay Correctional Institution strives to ensure the safety of the public, staff, and persons in our care (PIOC) by operating a safe, secure and humane institution. The institution provides PIOC with opportunities to participate in meaningful programs and activities to increase successful reintegration into the community by preparing and guiding them in making necessary life changes, as well as helping with resources for essential reentry into society.

History of Green Bay Correctional Institution

The Green Bay Correctional Institution is a maximum-security correctional institution that is administered by the Department of Corrections, Division of Adult Institutions. It is centrally located in Brown County between Green Bay, De Pere and the Fox and East Rivers.

In 1897, the Wisconsin Legislature approved \$75,000 for construction of a state reformatory for male PIOC ranging in age from 17-30 years old. An old, brick bicycle factory and 198 acres were purchased, then named the Wisconsin State Reformatory (WSR), which first housed eight PIOC, transferring from Waupun Correctional Institution on August 31, 1898.

Prison construction occurred in the next two decades: North Cell Hall from 1898-1904; South Cell Hall and Administration Building from 1915-1922; and a wooden fence by 1916 for the main compound, which was replaced seven years later by the 22-foot concrete wall that still stands today. These new facilities would serve a population of more than 800 PIOC.

In order to alleviate overcrowding in 1932, the State Legislature altered the age requirements for PIOC housed at WSR to 16-25 years. In 1972, WSR became a maximum-security prison for adult males. The name was changed to Green Bay Correctional Institution on July 1, 1979.

The majority of the now 29-acre grounds are contained within the perimeter walls. GBCI's current population of just over 930 PIOC is housed in the two original 294-bed cell halls, one dormitory unit, a mainstream unit, and a restrictive housing unit. The facility also includes a kitchen; two dining rooms; a power plant; textile facilities; academic and vocational education; health services; a chapel; psychological and social services; maintenance facilities; indoor and outdoor recreation facilities; a shower building; a visiting room; and administrative offices

Institution Facts

GBCI opened: August 31, 1898Security level: Maximum - male

Operating capacity: 749 Average daily population: 913 Uniform staff: 174 Non-uniform staff: 103 PIOC to Staff ratio: 3:1 Number of acres: 29

Inmate restitution: \$189,690.20Annual Operating Budget \$43,433,875.03

Program Supervision

The Program Supervision was initiated at Green Bay Correctional Institution in January of 2017. GBCI is divided into three general population areas for supervision; the North Cell hall, South Cell hall, and Dorm A\MU\TU\Step Unit to be supervised by one of the three Corrections Program Supervisors along with one Restrictive Housing Corrections Program Supervisor.

Program Supervision is an approach to PIOC management in which the total PIOC population of an institution is subdivided into smaller groups, which operate semi-autonomously. Through program supervision, PIOC are housed in decentralized units and managed by a familiar core team, with whom they communicate and interact with daily. This increased communication and interaction between staff and PIOC allows staff to proactively address PIOC concerns, and to better familiarize themselves with the PIOC assigned to their living areas. Assigned staff to each unit include at a minimum, a unit manager, correctional sergeants and officers, and social workers. Through program supervision, PIOC live among and participate in activities with PIOC housed within the same unit. Together, they function in a micro-community, where they are provided with a range of services and programs, perform assigned jobs and develop a rapport with a dedicated unit team, who help ensure proper and responsive care.

Program Supervision is equally as advantageous for staff as it is for PIOC. Communication between unit staff and administration is greatly increased, as frequent interactions with the Corrections Program Supervisor regarding daily activities takes place on a consistent basis. The gap between line staff and administration greatly decreases, as the CPS provides a link between staff who work regularly with the PIOC, and staff who are charged with making executive decisions regarding the institution. Program supervision also allows for a singular point of contact for other areas of the institution when there is question or concern regarding PIOC, and allows for a faster, more consistent response.

Education

Adult Basic Education (ABE) programming consists of the following:

- 1. High School Equivalency Diploma (HSED): preparation for those student/PIOC who have not complete their high school credentials. This instruction includes Mathematics, Social Studies, Science, Reading & Language Arts, Health, Civics, and Employability Skills.
- 2. Vocational Course/Program offerings include: Instruction leading to vocational technical college diplomas/certificates through Northeast Wisconsin Technical College (NWTC). Diplomas or certificate programs are offered in the following areas:

Barber/Cosmetology
Wood Tech/Cabinetry
Masonry
Business Operations Assistant
Related courses in Math and Communications

In order to be considered for enrollment in these programs, the student PIOC must have completed his high school education successfully, and scored at an 8.0 or better grade level on the TABE in Math and Communications.

<u>Enrollment</u>: Many students are enrolled in more than one level of classes due to differing scores and abilities in Math and/or Reading. Student enrollment statistics are below:

HSED – 125 students Vocational – 26 students

<u>Graduates and Program Completions</u>: Our school had many students show achievement in small steps and also in total program completions:

1+ HSED Exam Tests passed (Entire set not completed) - 5 Completed HSED-Diplomas - 4 Barber/Cosmetology - 4 Barber/Cos. State Boards - 4 Masonry - 2 Wood Tech/Cabinet Making - 3

Additional Programs

- 1. **Second Chance Pell Program** In fall 2021, GBCI launched the inaugural semester of an associate degree pathway in collaboration with Milwaukee Area Technical College (MATC). The degree is funded by Second Chance Pell monies by providing need-based Pell Grants to persons in our care. The initiative examines whether expanding access to college financial aid increases incarcerated adults' participation in postsecondary educational opportunities.
- 2. **Odyssey Beyond Bars** In spring 2022, GBCI began participating in the OBB expansion and offering a 3-credit College Writing course. OBB covers instruction from a UW-System faculty member, tutoring, and library/research support. OBB teaches credit-bearing and non-credit UW–Madison courses to students incarcerated in Wisconsin prisons. The program helps to give students the academic and professional opportunities they need to succeed when they reenter communities.
- 3. **Technical Math** In spring 2022, GBCI became the hub site for a course titled Technical Mathematics which is required by CTE programs across the state (e.g., culinary). Other DAI sites collaborate with GBCI to schedule Technical Math throughout the year. The course is delivered via a virtual learning environment, depending on the technology at the sending and receiving sites.
- 4. English as a Second Language Program (ESL)
- 5. Wisconsin Institutions Literacy Council Program (WILC).
- 6. **Re-Entry** (Available in the Library)

Additional Community Projects

GBCI was again involved in community service through the following projects undertaken by students enrolled in vocational education programs: 1) Masonry students made and painted numerous concrete birdbaths, planters and military stepping stones which were donated to civic organizations and institutional fundraising efforts. 2) Wood Tech students made and finished projects such as jewelry boxes, wooden chests, and wall shelves, many of which were donated to non-profit groups. Proceeds from all items made in these vocational programs went towards supporting non-profit entities. 3) In addition, approximately 5 PIOC had their hair cut by the Barber/Cosmetology students and donated it to Locks of Love.

Treatment Services

Under the leadership of four Corrections Program Supervisors, a staff of six general population Social Workers and one Restricted Housing Unit Social Worker provide overall case management and treatment programming to the PIOC population. Case management provides basic direction regarding institutional programming and adjustment during a PIOC's incarceration along with more specific duties, such as Correctional Offender Management Profiling for Alternative Sanctions (COMPAS) assessment, Unified Case Planning, parole planning, special placement needs, marriage screening, coordinating release/reentry planning including interstate placements, and working with the DCC field staff to set up approved placements and functioning as focal point of the Re-entry Program.

Casework counseling provides basic personal and emotional counseling revolving around a PIOC incarceration including daily living problems, family problems, marital problems, and assessing more specific program and treatment needs, which may entail referral to Psychological Services or recommendation for transfer to other facilities for specific treatment programming. Social Workers also provide Thinking for a Change, Anger Control, Domestic Violence, and Social Skills programming groups on a continual year-round basis.

A general population Social Worker is assigned to the Mainstream Unit to work with PIOC in the special management unit. Basic coping skills and education are the focus of this unit and the Social Worker is an integral part of a team approach to manage this population of PIOC who need closer guidance to cope with prison incarceration.

In the past, one general population Social Worker had been assigned a caseload exclusively consisting of all PIOC who are approximately within one year from release. During this past year, we have now transitioned this release specific caseload to all general population Social Workers. Social Worker staff assist PIOC in acquiring State of Wisconsin identification cards, vital documents, Badger Care calls, and referrals to various community resources. Several community-based programs such as Opening Avenues to Reentry Success (OARS), Disabled Offenders Economic Security Project (DOES) and the Community Corrections Employment Program (CCEP) have been enacted to work with soon to be released inmates in an effort to transition them successfully into the community.

<u>Reentry Simulation Fair</u>. GBCI holds an annual job/reentry fair for PIOC preparing to reenter the community. General population PIOC who release within one year past the designated job fair date are invited to attend. A multidisciplinary committee of staff coordinates vendors, monitor workshops, and mentor PIOC throughout the duration of this event. PIOC are interviewed, oriented, and required to complete the employment reentry module, as well as attend all preparation workshops facilitated by the Wisconsin Department of Workforce Development (DWD) and Northeast Wisconsin Technical College (NWTC) prior to attending this event.

<u>Alcoholics Anonymous (AA)</u>: AA is a voluntary support group who shares their experience, strength, and hope with each other that they may resolve their common problem and help others to recover from alcoholism. AA is not allied with any sect, denomination, politics, organization, or institution. The primary purpose is to stay sober and to help other alcoholics achieve sobriety. Area community AA members volunteer their services to the institution's group. The group consists of 15-20 PIOC under the supervision of a Social Worker. The group meets weekly and has been on-going for over five decades.

<u>Narcotics Anonymous (NA)</u>: The NA group is modeled after the AA 12-step program. This voluntary support program meets twice a month with up to three NA volunteers in each session along with one staff supervisor (Social Worker). The goal of the group is for the participants to

maintain sobriety through a system of support and education.

<u>Self-Management and Recovery Training (SMART)</u>: This voluntary program assists PIOC to gain recovery skills for all types of addictive behaviors, including: alcoholism, substance abuse, gambling addiction, and addiction to other substances and activities. The SMART Recovery Program offers tools and techniques for each program point: building and maintaining motivation, coping with urges, managing thoughts, feelings and behaviors, and living a balanced life. The group consists of 15-20 inmates under the supervision of a Social Worker.

<u>Veterans Group</u>: The Veterans Group meets on a monthly rotation and is geared to provide education and support to all GBCI incarcerated veterans. The Green Bay Veteran Service Officer from the Job Services Center is available for consult and attends groups upon request. Veterans can write to Social Services for more information regarding benefits and opportunities. Information is available in the prison library for their review and reference.

<u>Chapel Services</u>: One Chaplain provides religious services for eight umbrella religious groups. In addition to weekly services and special religious programming, the Chaplain provides crisis intervention services as well as support programming for PIOC, as needed. Outside volunteers provide a myriad of programming for various religious affiliations.

<u>Angel Tree Program</u>: This program, facilitated by the Chaplain, provides gifts for hundreds of children of PIOC. This popular program continues to draw larger numbers of PIOC children each year.

<u>Anger Management (AM)</u>: Green Bay Correctional Institution Social Workers facilitate Anger Management programming. This cognitive behavioral intervention program consists of 20 sessions, delivered in a closed group. This program targets criminogenic needs with clients assessed as high or moderate risk on the COMPAS assessment tool. Anger Management helps participants improve social skill competence and moral reasoning, better manage anger, reduce aggressive behavior and ultimately reduce recidivism. Program techniques are designed to teach participants how to control their angry impulses and take perspectives other than their own. Social Skills instruction prepares group members to engage in pro-social interactions based on self-understanding and consideration of the impact of their actions on others. Problem solving skills integrates the two previous interventions to provide group members with an explicit step-by-step process for addressing challenging and stressful real-life situations.

<u>Thinking for a Change (T4C)</u>: Thinking for a Change is a cognitive behavioral intervention program which consists of 25 lessons, delivered in a closed group. This program targets criminogenic needs with PIOC assessed as high or moderate risk on the COMPAS assessment tool. Thinking for a Change consists of three components: cognitive self-change, social skills, and problem-solving skills. Cognitive self-change teaches individuals a concrete process for self-reflection aimed at uncovering antisocial thoughts, feelings, attitudes, and beliefs. Social skills instruction prepares group members to engage in pro-social interactions based on self-understanding and consideration of the impact of their actions on others. Problem solving skills integrates the two previous interventions to provide group members with an explicit step-by-step process for addressing challenging and stressful real-life situations.

<u>Domestic Violence (DV)</u>: The Domestic Violence Program is a cognitive behavioral intervention program that consists of 43 one and a half hour sessions, delivered in a closed group. This program targets criminogenic needs with PIOC assessed as high or moderate risk on the COMPAS assessment tool. This Domestic Violence program focuses on three components; cognitive self-change, social skills and problem-solving skills. Cognitive self-change teaches individuals a concrete process for self-reflection aimed as uncovering antisocial thoughts,

feelings, attitudes and beliefs. Social Skills instruction prepares group members to engage in prosocial interactions based on self-understanding and consideration of the impact of their actions on others. Problem solving skills integrates the two previous interventions to provide group members with an explicit step-by-step process for addressing challenging and stressful real-life situations.

<u>Recreation Activities</u>: Organized softball, handball and basketball provide interested PIOC an opportunity to compete in a structured programming through the direction and coordination of staff Recreation Leaders. Tournaments include handball, iron man, horseshoes and basketball are on-going.

<u>Crochet/Sewing</u>: PIOC in MU participate in voluntary community service projects which include knitting and sewing. This year, hundreds of items were donated to various charitable organizations. These items include hats, mittens, bibs, quilts, baby blankets, duffel bags, and eyeglass cases.

<u>Pre-Release Modules/Resources</u>: Self-paced and reentry resource materials/documents are available in the library for PIOC to assist in their release planning.

<u>Gift of Incarceration Book Club</u>: New participants read and discuss five self-development books over the course of 16 weeks. Previous participants can request continued participation during the same 16-week timeframe, but meet a different night.

<u>Parenting Inside Out (PIO)</u>. PIO is an evidence-based program that addresses the unique challenges facing criminal-justice-involved parents and their children. In a classroom setting, parenting coaches lead students through a cognitive-behavioral parent management skills course to help each parent develop a parenting plan specific to the needs of their family. Parents identify the qualities/characteristics they hope their children will possess when they reach adulthood.

<u>Windows to Work (W2Work)</u>: GBCI has been chosen as the only male maximum secure site to pilot the Windows to Work program. GBCI's W2Work is a program to help PIOC who are close to releasing to the (first priority) counties of Brown, Outagamie, Manitowoc and Sheboygan. Objectives are to provide individual case management for each PIOC with the goal of increasing employability skills and employment opportunities to reduce the risk of reoffending, which in turn, creates safer communities in Wisconsin!

GBCI Social Workers work collaboratively with the Bay Area Workforce Development and Family Services of Northeast Wisconsin to provide W2Work.

<u>DBT Informed</u>: Dialectical behavior therapy (DBT) is a form of talk therapy that was originally developed to treat people who were diagnosed with borderline personality disorder (BPD), especially those who were chronically suicidal or struggled to regulate their emotions. DBT is a form of cognitive behavioral treatment that is now not only used to treat BPD but also substance abuse disorders, eating disorders, depression, and PTSD. It is an effective form of therapy for those who are struggling with serious mental illness. It has been shown to reduce suicidal behavior, self-harm and psychiatric hospitalizations. The full treatment of DBT, or comprehensive DBT, usually takes from six months to a full year and typically consists of four components: coping skills groups, individual therapy sessions, phone coaching and team consultation. The heart of DBT is to balance acceptance of the person exactly as they are at this moment in time, with efforts to improve or overcome behaviors that are destructive or maladaptive. This can gradually create a worthwhile life. Full or comprehensive DBT typically consists of four components: coping skills groups, individual therapy sessions, phone coaching and team consultation.

consultation.

Another choice that works for some people is to obtain DBT-Informed treatment. This is an option that doesn't include all the components of comprehensive DBT but may still help an individual build a better life. GBCI will be trained in providing the "DBT-Informed" version, which is the coping skills component only. In DBT Informed, different training and skills can be utilized to meet the individual needs of a group participant rather than moving through specific stages of treatment. For example, a person who is not severely ill or suicidal may benefit from the more flexible and personalized approach offered by DBT-Informed

<u>Mindfulness</u>: An open-ended group that will teach and then allow the practice of meditation. Mindfulness is known to have practical applications: it can lessen anxiety, boost immunity and increase focus. It also has shown to have a wide range of effects such as emotional regulation, choosing how to respond instead of reacting from habit and creates a deeper self-awareness. In each session, the teacher leads a guided meditation, then the group members have a chance to share. It is space to both practice and learn. No prior experience is necessary.

Treatment Center Units

Mainstream Unit

The Mainstream Unit (MU) is a small, 25-bed unit designed to house low functioning, vulnerable PIOC who have an education need. The unit is mostly self-contained, meaning most services are provided on the unit. The Mainstream Unit is staffed by sergeants, officers and a full-time teacher.

PIOC who reside on the Mainstream Unit are expected to participate in school and other programming which is offered. There are two PIOC tutors who are utilized to assist PIOC in their schooling efforts. MU also has a live-in tutor who resides on the unit with the PIOC, for a period not to exceed two years.

There is a Multi-Disciplinary Team which oversees the progress of PIOC housed in the Mainstream Unit. This team consists of the following: program supervisor, registered nurse, teacher, PSU staff, social worker and a representative from the unit staff. The team conducts weekly staffing with MU inmates.

Some PIOC in the Mainstream Unit have been managed with individual plans that are designed to reduce the opportunities for rule violations and thereby keeping the inmates out of Restrictive Status. These plans have been highly successful and the PIOC remain in the Mainstream Unit.

The PIOC in the Mainstream Unit participate in voluntary community service projects which include knitting and sewing. This year, hundreds of items were donated to various charitable organizations. These items included hats, mittens, bibs, quilts, baby blankets, animal beds, duffel bags, and eyeglass cases.

Transition Unit

The Transition Unit (TU) is utilized to house intake PIOC who have recently transferred to GBCI. The unit is also utilized to house PIOC on transition plans. A transition plan is utilized for PIOC who have spent lengthy periods of time in the Restrictive Housing Unit (RHU), so they can gradually adjust to a more open, less restrictive environment which affords more freedoms than those experienced during their time housed in the RHU.

STEP Unit

The STEP Unit houses Disciplinary Separation (DS) 3 PIOC. DS3 PIOC have earned their way through the disciplinary separation step process by demonstrating good behavior and positive adjustment. DS3 PIOC are housed on the STEP Unit to assist them in transitioning back to general population.

Psychological Services

The Psychological Services Unit (PSU) offers a variety of mental health services to all GBCl PIOC. PSU specifically focuses on the 65% (619) who have been identified as having some type of Mental Health Need. Of these, approximately 13% (81) have been identified as having some form of serious mental illness or intensive monitoring need, as defined by DOC's Mental Health Classification system (i.e. MH-2A, MH-2B and ID). Services provided by PSU staff include: individual and group therapy, psychological testing, psychiatric referral, crisis intervention, and 24-hour on-call services for mental health emergencies. PSU is also involved in referral to specialized treatment facilities (e.g., Wisconsin Resource Center (WRC), OSCI-TTC, CCI-SMU), as needed.

PSU provides a variety of services within RHU involving rounds, provision of services, and periodic monitoring of all PIOC on the identified mental health caseload, as well as contacts on requests for those not identified. Other essential functions handled by PSU staff include providing copies of records in response to appropriate requests by treatment providers and internal (DCC) and outside agencies (e.g., Social Security Disability Determination Bureau), scheduling and monitoring file review appointments in response to PIOC requests, and providing training on mental health issues, such as suicide prevention or stress management, to institution staff.

The focus continues to be the mental health needs in RHU and how we manage those with serious mental illness. If a PIOC who is identified as having a serious mental illness or condition receives a major conduct report, PSU staff conduct an assessment to determine whether mental health concerns should be considered as mitigating factors in the conduct report. In addition, if a PIOC with a serious mental health condition will be remaining in RHU for more than 60 days, a Behavior Management Plan (BMP) is written, which may follow that PIOC to General Population. The BMP can include input from Security, Social Services, Health Services, Education and PSU.

Suicide prevention and crisis intervention are core tasks for PSU clinicians. Given the unique features of the GBCI PIOC population, including a high proportion of late adolescent/early adult males, many with poor coping skills and lengthy prison sentences, GBCI experiences a large number of episodes of disruptive and/or self-injurious behavior. Historically, this is reflected in the high number of observation placements that occur each year due to self-injurious behavior, suicide attempts and threats of self-harm. FY22 had a slightly higher than normal year with 510 observation placements. Placements can vary from 300 to as many as 500. In the provision of such placements, PSU staff provide an initial assessment of self-harm risk, monitor this risk by making individual contact with each PIOC in observation status each working day, and conduct a minimum of two follow-up risk assessment contacts within the week immediately following release from Observation status. Average lengths of stay in Observation are variable, lasting anywhere from two days to over two weeks.

PSU staff at GBCI are often faced with PIOC whose mental health treatment needs exceed our resources. As a result, PSU strives to maintain a close working relationship with the Wisconsin Resource Center (WRC). In FY 22 we referred 14 PIOC to WRC. As staff time allows, GBCI PSU staff participate in monthly meetings at WRC, in which treatment progress and potential referrals are discussed.

PSU staff also conduct an intake interview and file reviews of each PIOC who enters GBCI with an identified mental health need. In a typical year this amounts to close to 300-350 intake assessments in general population, with an additional 50-100 intake assessments occurring in the RHU when PIOC transfer from another institution directly to GBCI's RHU. Each seriously mentally ill or ID identified PIOC who goes to RHU must be seen within one business day, whether sent as transfer within or without the institution.

Security

Security is responsible to maintain order and discipline at the institution. Other critical programs and services would not be offered to the inmates without the security services provided by the uniformed staff. In addition to security staff providing a safe, secure, and humane place for rehabilitation, security staff ensure it is a safe place for the non-uniformed staff to work. Only through the cooperative efforts of security and non-security staff, is GBCI able to achieve our mission and keep everyone safe.

GBCI employs 174 uniformed staff. Officers are supervised by 9 Lieutenants and 7 Captains. The Security Department head is called the Security Director and he is responsible for monitoring all security practices related to custody and safety.

A total of 7,195 Conduct Reports for inmate discipline were processed during the past fiscal year. Minor conduct reports: 3,983; Major conduct reports: 2,806, Dismissed: 406.

Visits

During this fiscal year, there were a total of 7,159 visits (2,605 contact visits; 4,554 Zoom visits) and 13,275 visitors.

Maintenance Services Department FY22		
Item	When	
PIOC Attorney Booths Upgraded	June 2021	
Re-Grout Tile Floors in Food Service	December 2021	
Marine Grade Rub Rails in Food Service	January 2022	
Air Compressor Upgrade In Power Plant	November 2021	
Fabricated and Installed Secure Door to Visitor Entrance To Add Additional Security	March 2022	
Fabricated and Installed Secure Tunnel Door	October 2021	
Retiled Food Service Cooler Floor	March 2021	
Removed asphalt, framed and poured concrete pad 20 x 80 for new outdoor rec equipment	May 2022	
Replaced section of front curb & gutter and repaved with new asphalt	June 2022	
Replaced roof top air conditioner for RHU control center	April 2022	

Added Staff water bottle filler in Restricted Housing Unit	August 2021
Installed and deployed new key watchers	April 2021
Updated old security area and moved records department from treatment center to this area	May 2021
Installed Tele-Doc Units	June 2021
Re-grout in Bakery floor	February 2022
Replaced High Pressure Steam Expansion Joint	August 2021
Replaced Low Pressure Steam and Condensate Expansion Joints School Tunnel	September 2021
Replace #4 Boiler Refractory	April 2022
Replaced Steam Isolation Valves in Treatment Center and Maintenance Support Building	September 2021
Replaced and Upgraded #4 Boiler O2 Trim PCC-II to PCC-IV	April 2022
Repaired and Restored to Operational Status #1 Boiler Fuel Oil Burner	April 2022
Replaced #1 Fuel Oil transfer Pump	May 2022
Upgraded #2 Feed Pump to VFD Motor	September 2022
Replaced 3512 Institution EDG starter and batteries	January 2022
Repairs and Upgrades to #1 thru #4 Boiler O2 Trim systems continues	June 2022
Repairs to #2 and #4 Boiler Burners Continues	June 2022
Upgrades to 3512 EDG Voltage Regulator and Control Panel Continues	June 2022
Upgrades to MSB PRV station Continues	June 2022
Repairs to Heating Plant DA tank Continues	June 2022
Upgrades to Power Plant Electric Panels Continues	June 2022
Cell Halls Utility Upgrades Project Continues	June 2022
Work Orders for Fiscal Year 2022:	Preventative = 2304 Corrective/Modification = 2586 Daily Corrective Cell Work = 1523 Total Work Orders FY22 = 4109

Brown County Corrections Relations Board

The Green Bay Correctional Institution, Community Corrections, and Sanger B. Powers Correctional Center maintain a joint Corrections Relations Board. Membership consists of local and state governmental officials, business leaders, and citizens. Information concerning changes or trends that are occurring within the agencies is presented, in order to keep all members informed of new or on-going issues. The members provide us with input into community issues

that may have an impact on our operations.

This board had many accomplishments. Our partners in DCC have provided numerous presentations continuing to educate the community about sex offender issues. Members of our board operate community Circles of Support to provide a local support group available to assist offenders released into the Brown County community. The members of this board have been involved in educating Brown County on community issues as well as correctional ones.

Mission Statement

The purpose of the Brown County Corrections Relations Board is to review information and generate recommendations regarding program developments and practices for PIOC that advance community safety.

This Board will strive to:

- 1. Enhance individual offenders' knowledge of and access to resources to allow successful reintegration into the community.
- 2. Develop continuity of supportive services for offenders and those on community supervision to promote success within the community.
- 3. Create opportunities for restorative justice for victims and offenders.
- 4. Develop collaborations with community partners to build a strong network of service providers.
- 5. Provide information and education to community members to enhance understanding of issues

Americans with Disabilities Act

The Americans with Disabilities Act (ADA) applies to staff, PIOC, and visitors to GBCI. The institution has a primary ADA Coordinator and a back-up ADA Coordinator. We work diligently to ensure fair and equitable treatment of PIOC, staff and members of the public with disabilities who seek access to DAI services, programs or activities.

Green Bay Correctional Institution has made reasonable accommodations for both PIOC and visiting members of the public under the auspices of the Americans with Disabilities Act. Some accommodations provided include but are not limited to: interpreters, vibrating alarm clocks for PIOC who are deaf, TTY relay phone services, video-phone, and large print literature.

Requests by PIOC for Americans with Disabilities Act qualification are processed in a timely manner. Upon receipt of a request for an ADA accommodation, the ADA Coordinator investigates and/or validates the information provided after thorough evaluation with qualified experts. Accommodations are then made as appropriate.

Records Office

The GBCI Records Office is responsible for the maintenance of accurate PIOC records involving lawful custody and release of PIOC as directed by the Wisconsin Statutes, Department policy, and court rulings. This includes management of inmate legal and social service files, coordination of Parole Commission hearings, facilitation of release, transfer and admission data; processing, calculating and updating of new sentence information; facilitation of court pick-ups, and scheduling of attorney visits and phone calls. In addition, the Records Office processes interstate and intrastate detainer requests, assists with PIOC requests for speedy disposition of warrants and detainers, service of process, verification of time served, and provides back-up notary

service to staff. In addition, staff also maintains the Visiting List computer files. The Records Office consists of two staff members and is located on the second floor of the Administrative Building.

Statistical data for the PIOC population is listed below:

Type of Offenses		
Violent Offense Property Offense	797 (87.89%) 49 (5.4%)

Health Services Overview

<u>Staffing</u>: The Health Services Unit (HSU) has scheduled on-site RN coverage 24/7 with the exception of Friday and Saturday nights. When there is not an on-site RN, there is an RN on-call. LPN staff, both permanent, agency and LTE, are on-site daily assisting with medication activities and patient care. Other medical staff members include the Health Services Manager, Assistant Health Service Manager, Nurse Practitioner, Dentist, Psychiatrists, Medical Program Assistants, Dental Assistant and Dental Hygienist, who work Monday through Friday with varying hours depending on operational needs.

<u>Other Medical Services</u>: Other medical services are provided for patients via contracted health care providers or LTE staff. On-site services include the following: X-ray, Optometry, Physical Therapy, Orthotic Specialist, Audiology Pain Services, Fibroscan and Ultrasound. For specialty consultations patients are seen by local providers and UWHC-Madison with prior authorization from the Bureau of Health Services. Urgent and emergency medical services are provided at St. Vincent's Hospital of Green Bay and various other local providers as needed.

<u>Medications</u>: Based on a prescriber's order, patients receive non-controlled medications, which are kept in the patients' rooms; and controlled medications, which are administered by nursing or delivered by correctional staff four times a day (i.e., 6 a.m., noon, 3:45 p.m. and evening). Medication distribution is documented in the electronic medical record.

<u>Medical Monitoring</u>: The HSU has two private, secured rooms, which are utilized for close medical monitoring and treatment as ordered by the Advanced Care Provider. Due to staffing patterns and coverage, patients who require 24-hour hands on nursing care are transferred to the DCI Infirmary where their medical needs can be met.

HSU Staffing Level		
Health Services Manager Assistant Health Services Manager	Nurse Practitioner (0.6 FTE)	
Nurse Clinician 4 (0.6 FTE) Nurse Clinician 2s (1 - 1.0 FTE, 1 - 0.8 FTE, 1 - 0.7 FTE, 3 - 0.6 FTE)	Licensed Practical Nurses (1-0.6 FTE, 2 - 0.5 FTE, 2-LTE positions)	
Medical Program Assistant Associate (1.0 FTE) Medical Program Assistant (1 - 0.75 FTE, 1-LTE position)	Dentist (1.0 FTE) Dental Assistant 1.0 FTE) Dental Hygienist	
LTE Psychiatrists (46 hrs/wk)	Physical Therapist (LTE) Agency (As needed)

¹Includes the number of patients seen by the Medical Doctor and Nurse Practitioners in general population and restrictive housing.

Offender Classification

Re-Classification provides a systematic review of a PIOC's custody level, program needs and placement. The RC committee customarily consists of the Offender Classification Specialist, a Security Supervisor, Education Director, and a Corrections Program Supervisor. The committee is charged with the responsibility to review a PIOC's security classification, assignment to an institution, and treatment program needs. The committee's recommendations consider risk relative to offense and offense history, institution adjustment, sentence structure, medical needs, clinical needs, program needs and any other relevant factors. The reviews are completed according to Wisconsin Administrative Code DOC 302 and occur at intervals of no more than twelve months.

²Includes the number of patients seen by nursing staff for sick call, scheduled appointments, emergencies, or admission to GBCI.

³This category includes the number of patients prescribed a controlled medication, including medical and psychotropic, that contributes to a team effort between Health Services and Security.

⁴Number of patients diagnosed with at least one chronic condition (i.e., Asthma, Diabetes, Dyslipidemia, HIV, Hepatitis C, Hypertension, and Seizure Disorder).

⁵This is the number of patients seen by Psychiatry either on-site or via video, which is referred to as telemedicine

⁶This is the number of patients seen on-site by the contracted optometrist and includes on site OCT clinics.

⁷This is the number of patients who review their medical records.

⁸The number of patients sent to the local ER, including admissions, and is also maintained and available through the DOC Third Party Administrator – SkyGen.

⁹Local consultations, procedures and surgeries have increased access to care as well as the standard of care in a timely fashion with improved provider to provider communication and decreased transportation costs.

¹⁰Oral surgery is done on-site except in rare occasions.

¹¹The UWHC-Madison appointments include categories of on-site appointments at the hospital and via video, which is referred to as telemedicine.

Food Service

The Food Department Service has a staff of 6 (out of 9) Correctional Food Service Leaders who monitor over 85 PIOC workers during the daily food preparation. The department is managed by a Food Service Administrator and Manager, ensuring safety and security of staff and PIOC. In addition, they maintain 10-15 different weekly menus (to accommodate both religious and medical special diets), requisition food/supplies and monitor the overall operation of the department to ensure that meal service runs smoothly. This past year saw staffing deficiencies and effects of COVID which required additional preparation of 6000 bagged meals per week, in addition to running normal meal prep operations. In Fiscal Year 2022, the Food Service Department prepared and served 1,120,400 total meals (1050 meals, 3 times a day). Due to the bagged meals being added to our operations, we did see an uptick in price/meal hover around \$2/meal/PIOC.

The menus are written to meet FDA guidelines of 2500-2750 calories per day and are monitored by registered dieticians. Menus are becoming more heart healthy by increasing proteins and decreasing sodium through the 4 week menu cycle. To enhance the menu, we made special meals as directed for holidays or varied the menu selection to increase meal options and inmate interest in the upcoming menu. Examples would be lasagna, sautéed cabbage with Cajun sausage, breakfast burritos, beef stew, pizza and baked chicken.

Badger State Industries (BSI)

Bureau of Correctional Enterprises (BCE) operates within the Department of Corrections and provides PIOC with work skills, soft skills and production specific training necessary to compete in the job market upon release to the community by employing PIOC to produce needed products and services. GBCI houses the BCE Textiles shop that employs 20-30 PIOC producing a wide range of textile products for DOC institutions.

The textile shop also provides embroidery services to a wide variety of institutions and non-profit organizations across the state of Wisconsin by embroidering over 2000 items this last fiscal year.

This last fiscal year the shop manufactured: 84,000 knit items including t-shirts and briefs 84,000 linen items 32,000 detention clothing items 12,200 mattresses and pillows

Volunteers

GBCI has over 80 active volunteers that are highly valued in their contribution to helping us fulfill our commitment to assist inmates in their reentry into society. GBCI offers the following programs with the assistance of these volunteers: Book Club, Alcoholics Anonymous, Narcotics Anonymous, Pet Therapy, Religious activities and Veteran's Affairs.
